

# EXPLORE OUR PREMIUM LASER SOLUTIONS

**MAGIC MACHINE TECH** is a forward-thinking company specializing in high-precision laser marking and welding solutions. Our goal is to provide businesses with cutting-edge, reliable machines that enhance productivity and deliver exceptional results across various industries.

We offer a range of advanced laser marking and welding machines, including fiber, UV, and CO2 laser systems. Our products are designed to meet the diverse needs of industries such as automotive, electronics, medical devices, and manufacturing. Each machine is engineered for durability, precision, and efficiency.

# MAGIC Machine Tech

where technology meets magic

## MAGIC LASER ENGRAVING MACHINE

At Magic Machines, we design manufacture high-performance, custom-built Fiber laser engraving machines tailored to meet the unique needs of various industries. Our machines enable precise product identification and traceability.

Leveraging cutting-edge Fiber laser technology, our machines offer numerous advantages, including:

1. **High performance**
2. **Easy programming**
3. **Minimal maintenance costs**

Our machines utilize a high-quality Fiber laser source, which emits a controlled beam through advanced optics and a precisely maintained focal length. This ensures efficient energy utilization and exceptional marking quality. The limited diffraction in the laser beam, combined with high accuracy in plus repeat frequency, enables:

1. **Fast marking speeds**
2. **Precise control over dimensions**

TRUST MAGIC MACHINES FOR RELIABLE AND HIGH QUALITY FIBER LASER ENGRAVING SOLUTIONS.

## PRODUCTS & SERVICES

Laser Marking machine

Laser Engraving machine

Portable laser engraving

Handled laser engraving

UV laser Marking machine

Co2 laser Marking machine

Co2 laser Cutting & Marking

Laser Welding machine

Dot Peen marking machine

# FIBER LASER STANDARD

The Magic laser is a state-of-the-art fiber laser marking machine, engineered to provide high-precision markings with speed and accuracy. Its robust design and advanced features make it an ideal solution for various industries, including industrial, medical, aerospace, and more. With a high-powered fiber laser source, advanced galvo scanning system, and intuitive software, this machine delivers:

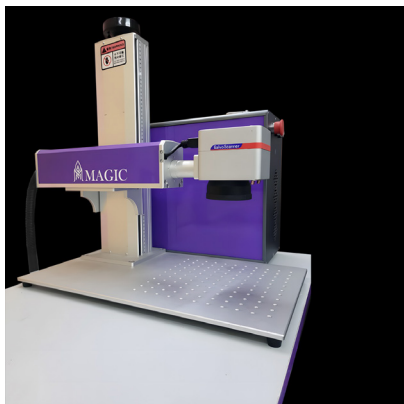

- High-resolution markings
- Fast marking speeds
- Flexible marking capabilities on various materials (metals, plastics, ceramics, etc.)
- Precise control and consistency
- Long-term reliability and durability

## HANDHELD LASER MARKING MACHINE

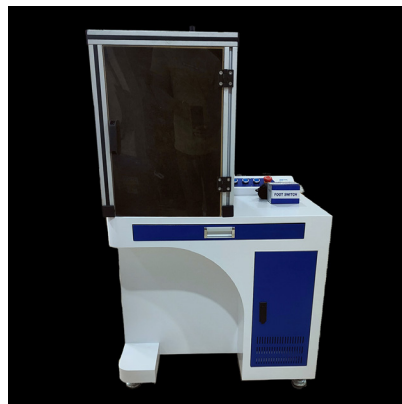

The Magic Handled marking machine is easy to handle both small and bigger products in critical areas.

1. **PORTABILITY** Easy to carry and operate in various locations, ideal for marking large or immovable objects.
2. **FLEXIBILITY** Suitable for a wide range of materials including metals, plastics, and composites.
3. **HIGH PRECISION** Delivers clear, permanent markings with minimal distortion.
4. **TIME-SAVING** Quick setup and fast marking process improve productivity.
5. **LOW MAINTENANCE** Durable design with fewer moving parts ensures minimal maintenance.

## PORTABLE MARKING

The Magic portable laser marking machine is a compact, lightweight system that uses a laser beam to create permanent marks on various materials, offering flexibility and ease of use for marking tasks in different locations and on various objects.

## GOLD MARKING

The Magic Gold laser marking is specialized laser marking system designed specifically for precision marking on gold, Silver and other precious metals.

## FLY MARKING

The Magic Fly marking is high-speed, non-contact laser marking system designed for precision marking on small, intricate, or hard-to-reach areas, line production unit and conveyor assembly areas.

## UV LASER MARKING MACHINE

The Magic UV laser marking machine is a high-precision solution designed for delicate and high-contrast marking applications. With its advanced ultraviolet laser technology, this machine delivers:

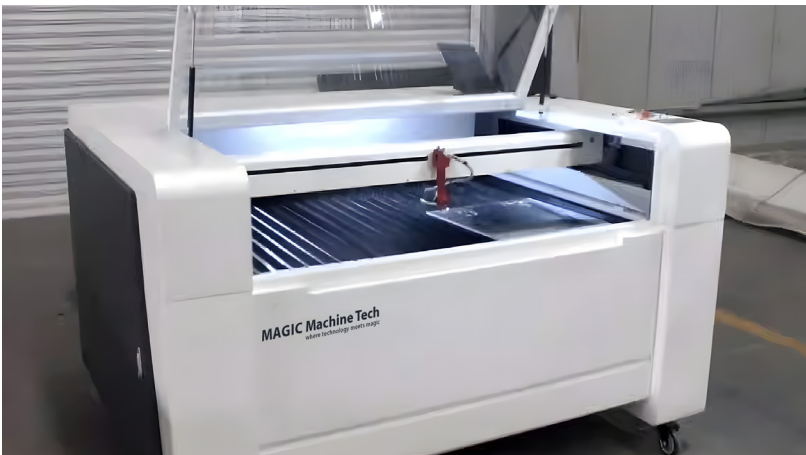

- High-resolution markings
- Precise control and consistency
- Gentle processing of sensitive materials
- Flexible Marking in both metal and non- metals

## LASER WELDING MACHINE

The Magic Laser welding is A precise and efficient welding system that uses a high-energy laser beam to join metals and thermoplastics with

Ideal for applications in aerospace, automotive, medical devices, and precision engineering.

## CO2 LASER MARKING AND CUTTING MACHINE

The Magic Co2 versatile laser marking system that uses a CO2 laser source to create permanent marks and Cutting on various organic materials, such as Plastics, Woods, Fabrics, Leathers and Papers

Delivers high-quality engravings, cuts, and markings with precision and speed. Ideal for applications in signage, packaging, textile, and more.
